

MS in ACCOUNTANCY LEARNING GOALS

1. Our students will enhance their understanding of accounting concepts and application of appropriate research tools to develop effective solutions to accounting problems.
2. Our students will demonstrate critical thinking skills necessary for identifying and addressing complex interdisciplinary situations, including ethical dilemmas.
3. Our students will enhance their ability to effectively communicate through oral presentations and writing assignments
4. Our students will develop diverse perspectives on global business through civic and global learning.
5. Our students will gain a broad, integrative perspective of the functional areas in accounting through applied and collaborative learning.
