JCU Analytics Edge

We are excited to announce the launch of our JCU Analytics Edge with two innovative classes for the Summer and Fall Terms: **Intro to Applied Data Analytics** and **Data Visualization with Tableau***! This special set of online courses will teach you how to apply data analytics to your skillsets, regardless of your background.

Much like an internship, these classes are designed to boost your resume with real-world skills and projects from companies like Spotify and Airbnb. **These special three-(3) credit hour courses are open to all students and can be applied as elective credit.**

And starting today, you can [reserve your seat for summer!](#)

Almost every industry from business to education, from healthcare to nonprofits, now requires employees who are able to use data to make better informed decisions. And in a time when industries of all types have been forced into a digital transformation, **tech skills are more important than ever.**

You can learn these in-demand tools and data skills in the JCU Analytics Edge. These courses will help you:

- **Build your resume** with real-world experience
- Develop **in-demand tech and data skills**
- **Earn Excel and Tableau Specialist Certifications** for your portfolio or LinkedIn
- Learn from a professor with experience at NASA: [Check out Dr. Alvarez's bio](#)

To learn more and reserve your seat, visit [JCU Analytics Edge](#) now!

See you in class!
